**Dr.T.Maheshkumar**

**Assistant Professor**

**Dr. B.R. Ambedkar School of Economics University**  
**Bengaluru-560072**  
**Karnataka, India.**

The aim of this programme is designed to provide a practical foundation in research skills, enabling them to understand how academic and field-based research is conceptualised and conducted. The sessions introduce simple yet effective methodological tools that students can readily apply in their project work, and independent research activities. In addition to developing essential primary research capabilities, the programme also equips students with the ability to identify, access, and utilise major secondary data sets available in India—such as NSSO Surveys, Census Data, RBI Publications, and Govt. Statistical Reports. Through this integrated exposure, students gain the competence to combine primary evidence with credible secondary data sources, thereby strengthening the quality, relevance and analytical depth of their research outputs.
