DATA ANALYTICS WITH ADVANCED EXCEL

03 - 18 March, 2021 From 3:00 pm to 5:00 pm
Through Virtual Mode

Scope of the Course

Microsoft Excel is a spread sheet program. It is used to create grids of text, numbers and formulas specifying calculations. It is mainly used for recording the income, expenditures, chart data, plan budgets, and briefly present financial results. Students can do mathematical calculations using this and can also store important data in it in the form of charts or spread sheets. The most impressive thing about MS Excel is that it can be used anywhere for any kind of work.

Enrolling in an online Advanced Excel training not only opens multiple doors of lucrative jobs but also allows the students of various fields to affordably learn new skills from experts.

MS-Excel is used by various organisations like:
