## About of the Course

Odoo is one of the leading open source ERP software, also previously known as OpenERP. Acronym of Odoo is On Demand Open Object. It is a suite of business management software tools including, CRM, e-commerce, billing, accounting, manufacturing, warehouse, project management, inventory management, Sales and Management of Human Resources. The primary programming language of Odoo is Python. Like the other technologies underlying Odoo, the Python language is open source and runs on all the major contemporary operating systems. It is an extremely popular programming language, which makes it very easy to find resources to help you get started. This course covers the customization of the Odoo to develop various applications to fulfill the business needs. The implementation of ERP software allows to improve the company's productivity and business processes, and overall growth.
